Introduction

The below Rectangle hall diagrams contain 96 Inch tables accommodating ten (10) guests unless otherwise noted. The hall diagrams do not include seating at the head table. For example, if you have sixteen people at the head table, the 420 person diagram seats a total of 436 people. The diagrams also do not allow for additional seating in the Lounge. The Lounge can accommodate up to (80) additional guests.

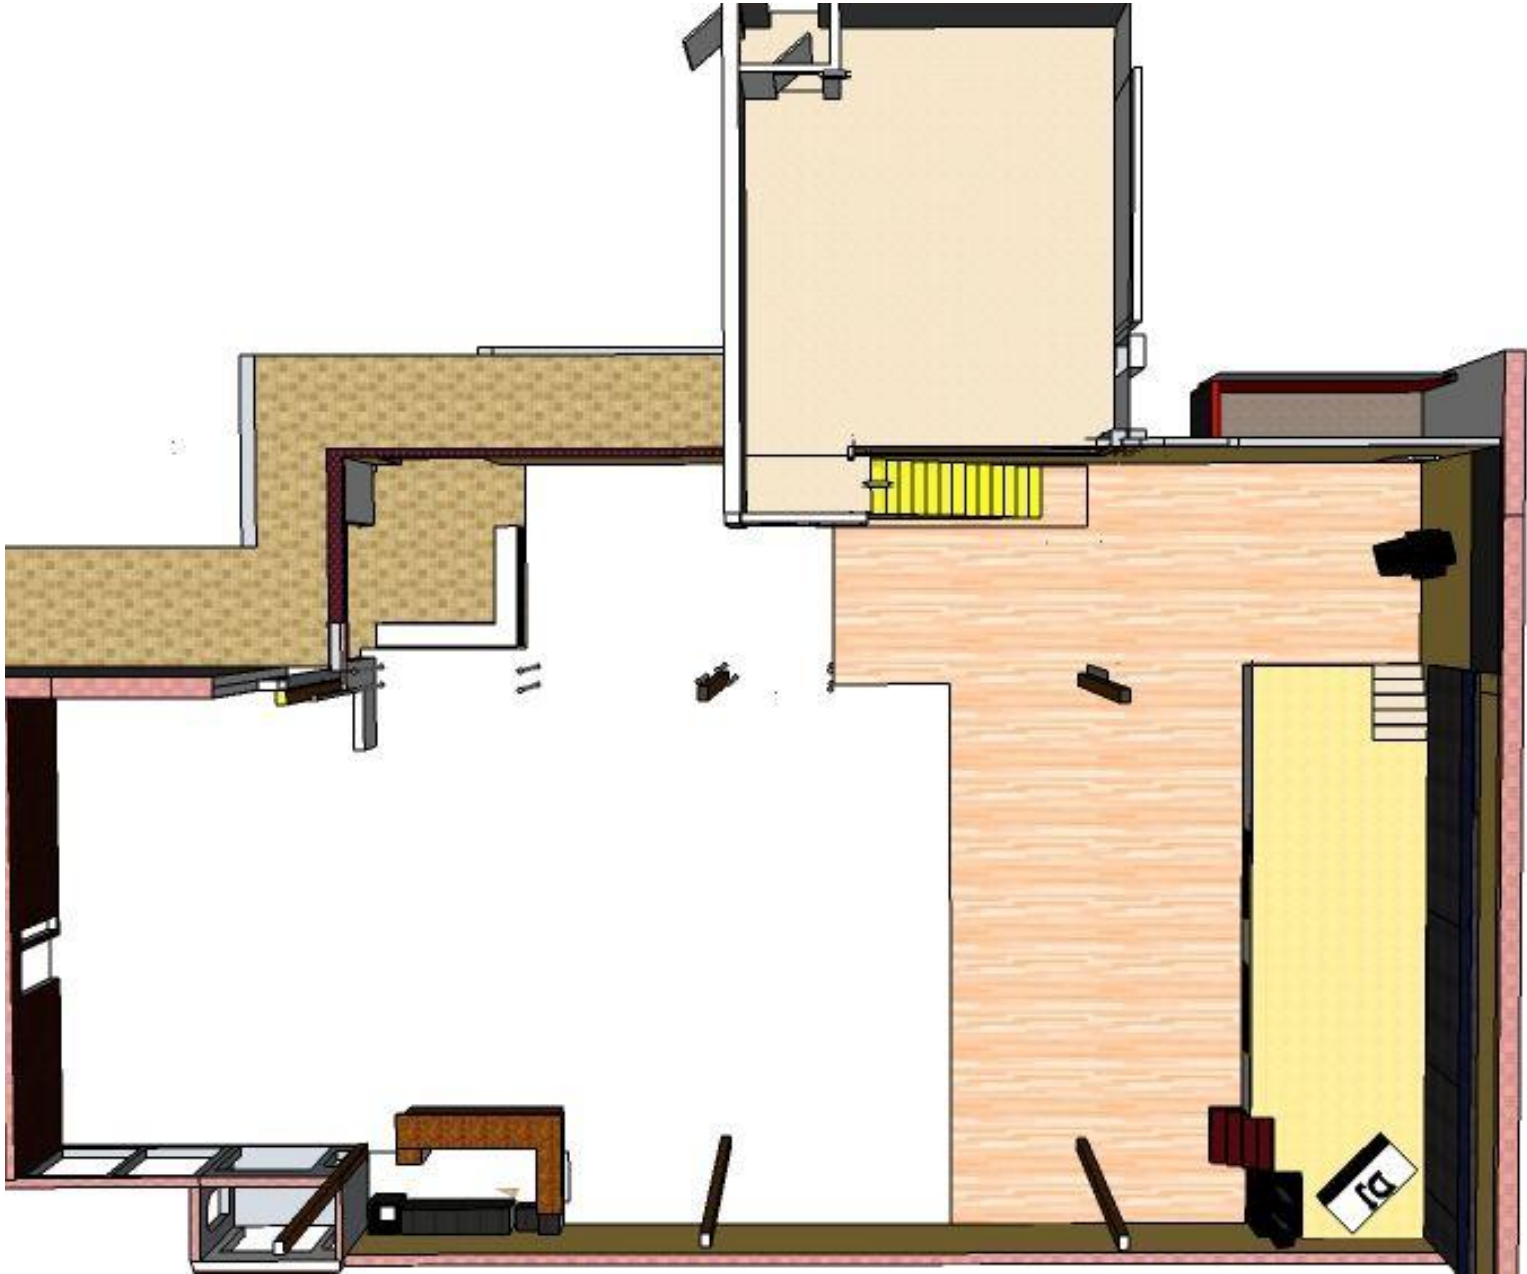

The below Round diagrams include 60 Inch Round Tables seating eight per table. This is our recommended number per table. To accommodate larger numbers of guests, you may seat up to nine per round table. If you seat nine per table, the 304 person diagram would accommodate 342 guests. The Mixed table diagrams combine 60 inch round tables at eight per table and 96 inch rectangle tables at ten per table.

Diagrams with empty space can be filled in with buffet tables, cocktail tables, ornamental couches, etc.
