

# You, Being Happy.

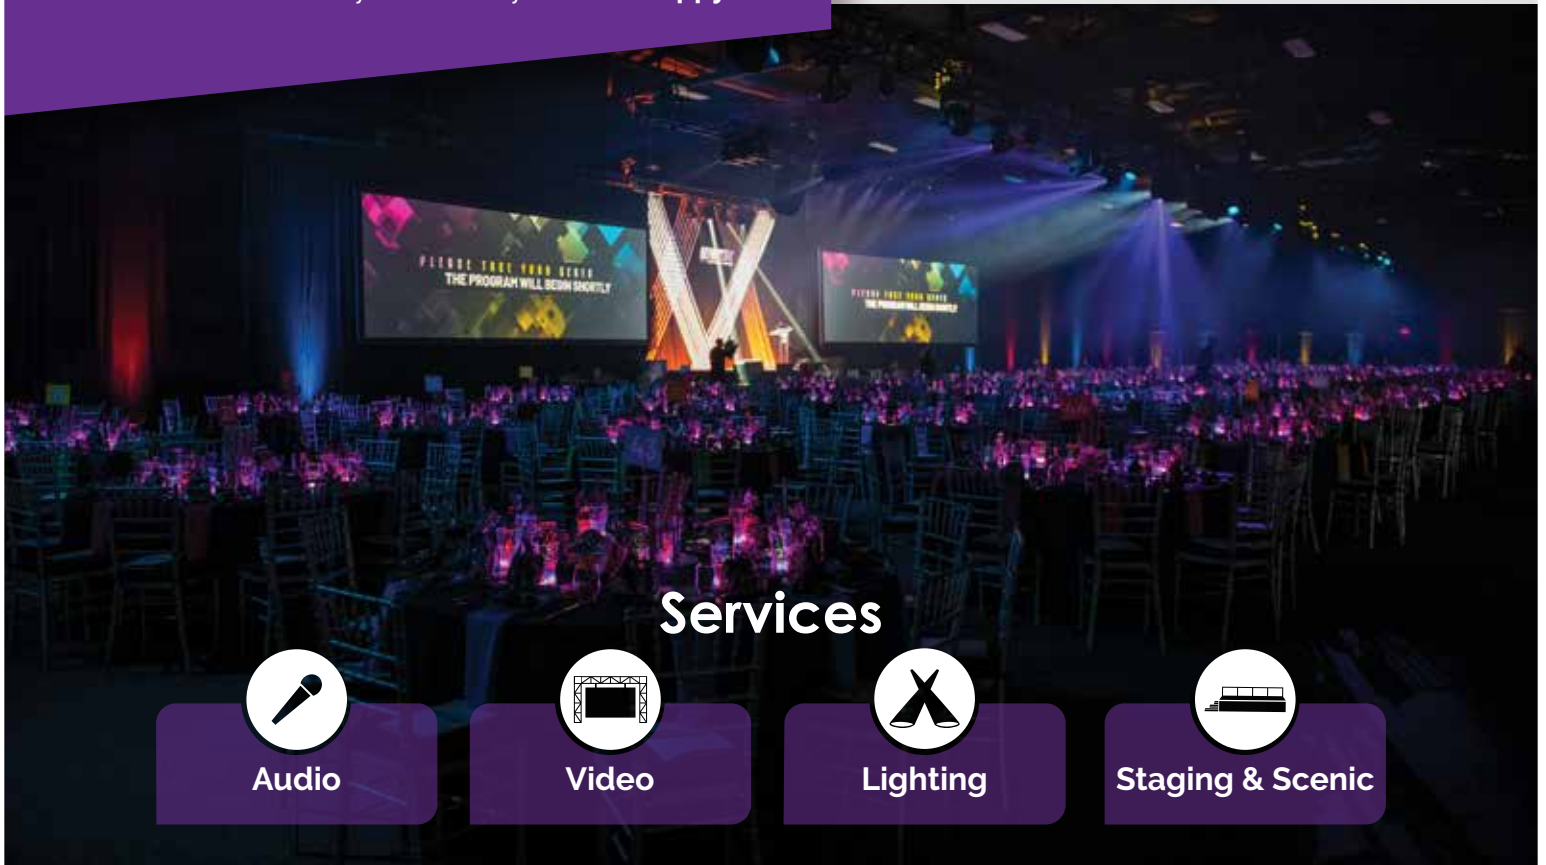

Synergetic provides award winning **audio, lighting, video, and staging** to customers who want to have meaningful events. Our typical customer can commission us to work on a variety of shows, such as large concert productions, corporate audio visual, and creative experiential events.

We are successful because we constantly focus on the **customer experience**. We want to anticipate the attention the customer deserves, with as little effort from them as possible, saving them time.

We believe the fewer people you need to talk to about your event means the happier you will be. And at the end of the event, all we really want is for you, to be **happy**.
